Vijaya Institute of Technology for Women
Phone no:8008842308

Name of the Coordinator : Mr. M.SARANYA

No. of Participants :75

Program Objective : Recent advances in algorithmic techniques, computation and memory technologies have reinvigorated interest in artificial intelligence (AI). Many of the successes in AI in last few years have come from its sub-area computer vision which deals with understanding, and extracting information from digital images and videos. This course provides an introduction to computer vision including fundamentals of image formation, camera imaging geometry, feature detection and matching, multiview geometry including stereo, motion estimation and tracking, and some machine learning problems such as image classification, object detection, and image segmentation. We focus less on the machine learning aspect of computer vision in this course, which will be really done in Advanced Computer Vision.

Topics Covered : Digital Image Processing, Image Formation, Image Filtering, Edge Detection, Principal Component Analysis, Corner Detection, SIFT, Geometric Techniques in Computer Vision, Image Transformations, Camera Projections, Camera Calibration, Depth from Stereo, Two View Structure from Motion, Object Tracking, Machine Learning for Computer Vision

Program Outcomes :

- Recognise and describe how mathematical and scientific concepts are applied in computer vision.
- Identify and interpret appropriate sources of information relating to computer vision.
- Apply knowledge of computer vision to real life scenarios

About the Course

- VHDL is generally used to write text models that describe a logic circuit. Such a model is processed by a synthesis program, only if it is part of the logic design. A simulation program is used to test the logic design using simulation models to represent the logic circuits that interface to the design.

Objectives

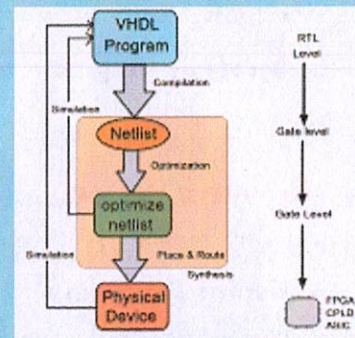

- The VHSIC Hardware Description Language (VHDL) is a hardware description language (HDL) that can model the behavior and structure of digital systems at multiple levels of abstraction, ranging from the system level down to that of logic gates, for design entry, documentation, and verification purposes

Outcomes

- VHDL has file input and output capabilities, and can be used as general-purpose language for text processing, but files are more commonly used by a generate text output.
- Both LRM's specify a text output with which you can display signal values as a list of '1' and '0' values vs. time

Topics to be covered

- An Introduction to VHDL, Design
- Elements in VHDL: ENTITY, ENTITY DECLARATION,
- ENTITY EXAMPLE,
- Design Elements in VHDL: ARCHITECTURE,
- ARCHITECTURE Syntax ,
- ARCHITECTURE Example,
- Design Elements in VHDL: COMPONENTS,
- Component Example,
- Design Elements in VHDL: Configuration,
- Design Elements in VHDL Packages,
- Design Elements in VHDL: Libraries,
- Object and Data Types in vhdldata Types,
- Enumeration Type.

Vijaya Institute of Technology for Women
Phone no:8125326668

Name of the Coordinator : Mrs. P.SILPA

No. of Participants :75

Program Objective :. The VHSIC Hardware Description Language (VHDL) is a hardware description language (HDL) that can model the behavior and structure of digital systems at multiple levels of abstraction, ranging from the system level down to that of logic gates, for design entry, documentation, and verification purposes

Topics Covered :An Introduction To VHDL,Design Elements In VHDL: Entity,Entity Declaration,Entity Example,Design Elements In VHDL: Architecture,Architecture Syntax ,Architecture Example,Design Elements In VHDL:Components,Component Example,Design Elements In VHDL: Configuration,Design Elements In VHDL Packages,Design Elements In VHDL: Libraries,Object And Data Types In VHDL data Types,Enumeration Type.

Program Outcome : VHDL has file input and output capabilities, and can be used as general-purpose language for text processing, but files are more commonly used by a simulation HDL and Verilog can generate text output. Both LRM's specify a text output with which you can display signal values as a list of '1' and '0' values vs. time
